

4th General Discussion Event 2010
“Technology Transfer in Bangladesh and the role of development organizations”

Day and Date: Thursday, November 4, 2010

Time: 3:30 pm to 5:00 pm

Venue: IDE Bangladesh
House 21, Road 123
Gulshan -1, Dhaka -1212

Phone: 9886515, 9883901

Background

Technology transfer is the process of sharing of skills, knowledge, technologies, methods of manufacturing, samples of manufacturing and facilities among creator/ developer and other institutions to ensure that technological developments are accessible to a wider range of users who can then further develop and utilize the technology into new products, processes, applications, materials or services.

In Bangladesh, various government institutions especially in agriculture sectors are engaged in transferring the technology to the farmers for better yield. One of the most important technology has been transferred to the farmers are the irrigation technology.

Financial organizations are also engaged, may be not directly, transferring the technology for the development of the community.

Objectives:

- To disseminate the technology transfer concept and its strategies to the development partners
- Harnessing development partners to contribute to promote Technology transfer
- Provide examples of successful transfers of technology.

Outcome of the Discussion:

The intended outcome of the event is to understand the technology transfer in financial and agriculture sector and how to make synergic effect of the development partners for local economic development providing appropriate support.
